Site Analysis:

Site Improvements - This SDP proposes the construction of 35 SFA residential dwelling units and other related site improvements. This SDP is designed in accordance with the "Traditional Neighborhood Design" (TND) concept with the townhomes fronting closely to the public streets to define an urban streetscape to promote pedestrian traffic within the community. These 35 townhomes shall front along both sides of Market Street and will have attached garages at the rear of the lots served by a 16' wide paved private use-in-common alley. On the north side of Market Street, there will be nineteen (19) townhomes and on the south side of Market Street, there will (16) sixteen townhomes. Both row of townhomes will have attached garages at the rear of the lots served by a 16' wide paved private use-in-common alley. Each of the townhome units will accommodate their required two off-street parking spaces within their garages. A total of 70 off-street parking spaces are required for these units (35 units x 2 spaces each) with 70 parking spaces provided within two car garages. In addition, there are un-striped on-street parking spaces provided for overflow and visitor parking within the Market Street right of way. No parking is permitted within the private alley.

Storm Water Management (SWM) - Storm water management for this project is provided in regional SWM facilities constructed under Final Plans F-08-055 and F-12-021.

Environmental Considerations - There are no 100 year flood plain, wetlands, streams or buffers located within the subject residential lots.

Landscaping - The Landscape Plan for this project complies with the alternative compliance provision of the Howard County Landscape Manual and the Maple Lawn Farms Landscape Design Criteria. The developer is providing the required shrubs (at a rate of 1 per 4 feet of lot width at BRL). A total of 228 shrubs shall be planted along the front of the townhome units.

Forest Conservation - This project previously addressed the forest conservation requirements of Section 16.1200 of the Howard County Code under the processing of Final Plan, F-08-054.

Adequate Public Facilities - This project passed the tests for road adequacy and open schools under the CSP, S-01-17 and Amended CSP, S-06-16.

Development Criteria – This SDP complies with all development criteria requirements approved under S-06-16 and PB Case No. 378. All proposed SFA dwellings and related improvements comply with the setback and height requirements that are outlined under the CSP, S-01-17 and the Amended CSP, S-06-16.

Planning Board Criteria:

This SDP is in compliance with the five criteria requirements of Section 127.0.F.2 of the Howard County Zoning Regulations for Planning Board approval of a site development plan as follows:

1. **Is consistent with the approved Preliminary Development Plan (PDP), Comprehensive Sketch Plan (CSP) and Development Criteria.**

The site design for the proposed SFA residential dwellings and associated site improvements are consistent with the approved PDP, CSP and Development Criteria requirements approved for this project. This SDP is also consistent with the purpose and design concept for a "Traditional Neighborhood Design" (TND) development.

2. **Satisfies the applicable requirements of Section 127.0.E.3 (Decision by the Planning Board for the CSP and Development Criteria).**

This SDP satisfies the requirements of Section 127.0.E.3 of the Zoning Regulations which describes the Planning Board's approval decision of the CSP and the Development Criteria. The Planning Board approved the amended CSP and Development Criteria under PB Case No. 378 by a Decision and Order dated January 25, 2007.

3. Makes effective use of landscaping to provide buffers where needed and to enhance the site design.

The home builder proposes to install enhanced landscaping for each of the SFA lots at or above what is mandated by the approved PDP, CSP, the Howard County Landscape Manual and the MLF Landscape Design Criteria. The MLF Landscape Design Criteria requires the planting of 1 shrub per 4 linear feet of lot width in the front yard and no landscaping in the side or rear yards. Therefore, a total of 228 shrubs of varied species, along with the required streetscape planting along the public streets, shall be planted along the fronts of these proposed townhomes.

4. Provides squares, plazas or other useable landscaped areas within apartment developments, office developments or focal points.

This SDP in conjunction with Final Plan, F-14-069, will provide the landscaping and other site amenities including street lighting, street trees and pedestrian sidewalks as part of the development of these townhome units. A nearby community square/open space area (Open Space Lot 68) and an athletic field shall be provided in accordance with the approved PDP, CSP and previous approved development plans for this project.

5. Implements the pedestrian circulation system for the MXD Use Development.

This SDP in conjunction with Final Plan, F-14-069 and other approved or future SDP's will provide the pedestrian circulation system including sidewalks, pathways and crosswalks for the Westside District of Maple Lawn Farms. Sidewalks will be provided on both sides of all public streets adjacent to the proposed townhome units in accordance with approved Final Plan, F-14-069 and this SDP.

Please note that this file is available for public review at the Department of Planning and Zoning's public service counter, Monday through Friday, 8:00 a.m. to 5:00 p.m.
